

# WATER SUPPLY SUMMARY

- Water user “nominal 400 TAF/yr” relative to Accord + upstream AFRP by end of Stage 1 is 250-300 TAF/yr average, more in drier and less in wetter years
- Games 1, 2, and 4 produce less water than this nominal amount
- Game 3: possibly OK on average, short in dry periods
- So far, no game produces enough water to satisfy export water users
